

TOPIC: IF I WERE PRESIDENT...

BADESON J. BYELEZARO

ST. PATRICK'S ACADEMY, NUMAN

(CLASS: SS3)

20TH NOVEMBER, 2015

IF I WERE PRESIDENT...

Being a President of any nation is a great opportunity to serve the people of that nation, it is the people's trust on you.

If I were the President our great country, Nigeria, I will try and accomplish the following:

- i. Improve our educational system
- ii. Ensure equal right to all citizens
- iii. Improve technology
- iv. Security
- v. Improve health care service
- vi. National resources and
- vii. Developed agricultural system

In many of our public schools today, both students and staff are faced with the challenge of infrastructures such as classes, adequate and modern science laboratory, ICT laboratory, library, toilet, furniture, etc .

If I were the President, I will ensure those infrastructures are adequately provided and modern facilities. I will also ensure that there are adequate numbers of teachers to take each subject and all staff will be motivated by increasing their salaries and paying them in time.

I will ensure that all the public schools have good and quality books such as textbooks, eBooks, etc. I will ensure that the laboratory have all the apparatus and reagents needed for SSCE practical and other relative examinations. I will make sure that the schools have good computer laboratory and have adequate computers for

students to use. As the president, I will also ensure that all schools are improve to meet international standard adequately supplied with teaching aids and materials that will create a conducive and comfortable environment for learning to both teachers and students.

Technology as observed in our country today is on a developing level, owing to the fact that schools still use traditional blackboards to teach, hospitals still use traditional delivery equipment for child birth, manual security is still trusted to automated one. As the president, I will ensure in the all public schools are provided with LED boards with project to aid learning. As the president also, I will ensure that all hospitals are stocked with medical equipment for proper treatment of patients. As the president also, online learning will be made available to adults and disabled that will have difficulties in travelling from one part of the country to the other in search of education.

As the president, I will ensure adequate provision of sophisticated machines that our military personnel can use to combat war or any form of social unrest. As can be observed in our country Nigeria precisely the North East that have witnessed insurgency for over six years now, talking about the Boko Haram insurgency in the North East, it is attributed to lack of adequate combat machines that will end such a war that have claimed so many lives since the inception. As the president, I will ensure that the military at war front are given adequate equipment that will give them the morals to combat such social unrest.

As the president, I will ensure that the issue of security is tackled by giving adequate and quality training to the force men and also acknowledging their presence. As can be observed, our military today in the country have lost their

morals to face any war or social unrest. As the president, I will ensure that such morah is restored during recruitment and training of such military.

The security of the country lies on the shoulder of every citizen, as such as the president proper strategies will be put in place to ensure that every citizen is security conscious. Since 2009, Nigeria have been facing the challenge on insecurity, talking about the present Boko Haram insurgency in the North East, just of recent another bomb blast was witnessed at Jambutu, Yola (Punch Newspaper, 17th November, 2015) that claimed about thirty four (34) lives. As the president, I will ensure that strategies are taken to prevent such events from occurring and total eradicating such from our community.

As the president, I will let all force men realize that if any one of them dies at duty, the government will take proper care of his family and will give his children quality education up to the tertiary level.

With the current level of poor health care services in the country, a high percentage of death rate is on the increase every year. In our health care centres, hospitals, etc. as the president, I will ensure that proper and adequate training is given to such personnel. I will also ensure that orientation in the form of workshops is given on periodically basis that will help sensitize such personnel on the improved methods of health care services. This can go a long to reduce the rate at which lives are lost in the country due to poor health care services. Also as the president, I will make sure that immunization exercise is carried out on certain diseases such as polio, myengitis, etc to help eradicate such diseases totally from our society.

It is observed that workers of the health sector are not paid salaries for three months, as the president, I will ensure that salaries are paid to such workers in time.

As the president, I will ensure that their salary scale and structure is bettered which will serve as a motivation to them to work hard.

As the president, I will ensure that we go back to our agricultural sector which represents a greater percentage of our employment opportunities. Nigeria was at one time a leading economy in exportation of palm oil, cocoa and rubber. But since the discovery of crude oil, the agricultural sector has been neglected. We all know that Nigeria has great potential to become an important exporter of livestock and food. And lastly I will ensure that we do not only depend on oil only but also on our agricultural sectors and other resources that we have.

As the president, I will ensure that all this matters of urgency are well addressed and taken care of within the 100 days of my position in the office of the Commander in Chief of the Arm forces.

Thank You

BADESON J. BYELEZARO
